The Project

The City of Imperial Beach is in the process of updating its General Plan (GP)/Local Coastal Program (LCP) to address the impacts of sea level rise (SLR) and climate change by translating some of the adaptation strategies identified in the 2016 SLR study into policies and implementation measures. Also included in this project will be a Complete Streets Policy and a qualified Climate Action Plan (CAP). A draft Negative Declaration (ND) is being prepared in order to satisfy requirements of the California Environmental Quality Act (CEQA). This project is being funded by a \$225,000 grant from the California Coastal Commission augmented by \$150,000 from the City's general fund. The City hired AECOM to assist with this LCP Update project.
